## PROJECTS

---

<b>TrashSmart – Your All-in-One Waste Solution</b> Developed a smart waste management system to optimize waste collection and sustainability. Enabled real-time monitoring of smart bins, trucks, and routes; supported role-based management for organizations, households, and contractors; and implemented an auction system to improve recyclable waste recovery. – Technologies: React.js, Java Spring Boot, React Native, PostgreSQL, Arduino, Sensors, Git, Jira, GoogleMaps, Tailwind CSS, NativeWind, Docker	<b>2024 - 2025</b>
<b>Fix Fast Buddy – Vehicle Breakdown Assistance System</b> Developed a real-time vehicle breakdown assistance system enabling efficient service requests between vehicle users, individual mechanics, and auto garages. Implemented location-based request distribution, direct request handling for independent mechanics, and job assignment workflows for garages to manage and allocate tasks effectively. – Technologies: Android Native(Kotlin), Php, MySQL, Retrofit, Firebase, Google Maps, XML, Git, Github	<b>2023 - 2024</b>

<b>Hekto – AI-Powered Smart E-Commerce Platform</b> Developed a furniture marketplace featuring an AI shopping assistant for natural language product discovery. Implemented a headless CMS for real-time inventory synchronization and engineered a secure checkout pipeline with Stripe. Optimized performance using modern state management and responsive design for a high-speed user experience. – Technologies: Next.js, React.js, Sanity CMS, Stripe, Clerk, Tailwind CSS, Vercel AI SDK, Zustand	<b>2025</b>
---	-------------

Developed a full-featured e-commerce platform using the MERN stack, enabling product browsing, filtering, and secure purchases. Integrated Stripe payments and JWT-based authentication. Built an admin dashboard for managing products, orders, users, and revenue analytics with data visualizations.

– Technologies: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Stripe API, JWT, Firebase Storage

## ACADEMIC RESEARCH

---

### Cognitive-Inspired Defense Framework for Federated Learning

**Ongoing**

Developing an adaptive defense architecture to mitigate model poisoning attacks in Federated Learning. Integrates cognitive reasoning loops (OODA and MAPE-K) for proactive anomaly detection and dynamic response. Implemented scalable FL pipelines using Flower and PyTorch, with modular orchestration for multi-client simulations and automated evaluation for accuracy, ASR, and FPR under adversarial conditions.

## CERTIFICATIONS

---

- **AWS – AWS Fundamental Specialization (Coursera)**
- **Meta – React Native Specialization (Coursera)**
- **Meta – React Basics (Coursera)**
- **Meta – Introduction to Mobile Development (Coursera)**
- **Coursera Project Network - Docker for absolute beginners (Coursera)**
- **Postman – Postman API Fundamentals Student Expert (Postman Academy)**
- **Amigoscode – Spring Boot for Beginners**

## SKILLS AND INTERESTS

---

**Languages:** Java, Kotlin, JavaScript, TypeScript, PHP, C/C++

**Frontend:** React.js, Next.js, Tailwind, NativeWind

**Backend & APIs:** Node.js, Express.js, Spring Boot, PHP, REST, JWT

**Mobile:** React Native, Android (Kotlin), Firebase, Retrofit

**Databases:** MySQL, PostgreSQL, MongoDB, Firebase

**Cloud & DevOps:** Docker, Kubernetes, Argo Workflows, GitOps, Azure Blob Storage, Kafka

**Tools:** Git, Jira, Postman, Figma, Sanity, Stripe, Google Maps, Clerk, Zustand, Redux, Vercel, Wordpress, Github Copilot

**Soft Skills:** Fast Learning, Communication, Leadership, Problem Solving, Time Management, Teamwork

**Areas of Interest:** Software Engineering, Artificial Intelligence & Machine Learning, Web3 & Blockchain, Sports

## EXTRA-CURRICULAR, SPORTS, VOLUNTEERING & ACHIEVEMENTS:

---

<b>Captain of the University of Colombo Wrestling Team</b>	2024
<b>University of Colombo Wrestling Colours Awarded</b>	2023 & 2024
